

## Industrial space in the CEE region - 10,000-square-meter build-to-suit facility for ASSA ABLOY in Týniště nad Orlicí in the Czech Republic.

The project is a stand alone BTS located in Týniště nad Orlicí (20 km from Hradec Králové city center) in eastern Czech Republic.

The customer ASSA ABLOY Rychnov, part of the Swedish-based ASSA ABLOY Group, the global leader in door opening solutions, has leased 10,000 square meters of industrial space in the newly delivered building, which serves as a production plant.

The facility will support the automotive market brand FACEA growth strategy within the automotive industry market segment.

Panattoni Europe has already cooperated with the ASSA ABLOY Group in Stříbro, where BESAM, another company belonging to the Group, leases 15 000 square meters of space at Panattoni D5 Logistics Park.
